KRISTINA

A Knowledge-Based Information Agent with Social Competence and Human Interaction Capabilities

LATEST NEWS ABOUT THE PROJECT

X-Patient 2017 : save the date!

See you in Barcelona at the X-Patient Congress on September 14th! Our partners are going to meet European stakeholders interested in the project development and future application of all the different modules. An extended knowledge has been developed and our partners are now presenting how KRISTINA will advance the state of the art in dialogue management, multimodal (vocal, facial and gestural) communication analysis and multimodal communication [Read More]

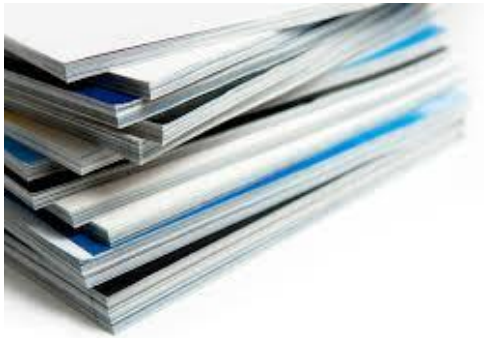

Our researchers were in Stockholm (Sweden) presenting 3 different papers on using prosody to classify discourse relations, a thematicity-based prosody enrichment tool for CTS, a tool for prosody visualisation of large speech corpora. [\[Read more\]](#)

StarTrek-style communicator

EU supported project aims to create #StarTrek-style communicator to break down cultural barriers. The Horizon Magazine published an interesting article related to innovation technologies able to break down cultural barriers. You can find the article at the following web page: [Horizon Magazine](#)

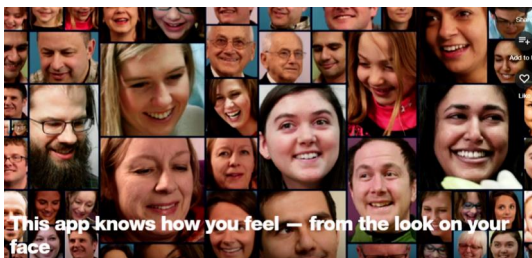

Check our new publications

Check the new publications in the dedicated area of our web. Our researchers are constantly working in five different research areas: adaptive dialogue management, vocal communication analysis, mimics and gestures analysis, content search reasoning, expressive communication generation. [\[Read more\]](#)

Blog: Living at the age

By the demographic change in modern societies the health and care system are faced with many challenges. In Germany, the life expectancy of the people is rising continuously over the years and based on these developments a huge number of "alternative" residential forms has developed during the last years...
